

# Delivery App Platform Guide

Launch Your Own Delivery App in Days

Client App • Driver App • Admin Panel • Vendor Portal

## What Is It ?

A complete, branded delivery platform you can launch in days, no coding, no delays.

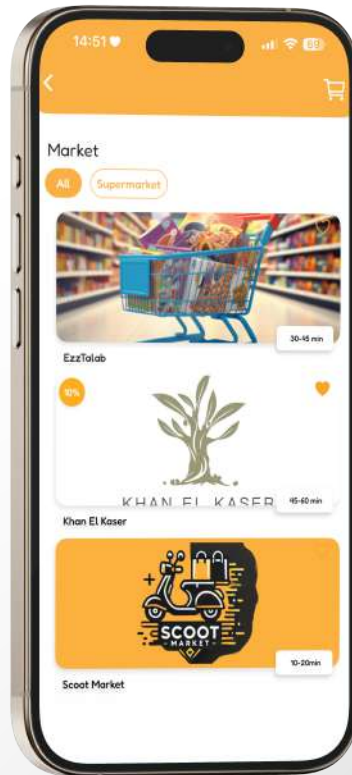

### Here's what's included:

- A modern mobile **app for clients** to browse, order, and track in real time.
- A simple, intuitive **app for drivers** to accept and complete deliveries.
- A powerful **admin dashboard** to manage orders, payments, drivers, and stores.
- Vendors can easily manage their products, prices, and orders through the **Vendor Portal**.

### Perfect for :

- Grocery stores, food delivery, and pharmacies.
- Flower shops, retailers, and eCommerce brands.
- Courier services, on-demand delivery, and local logistics.

# What's Included?

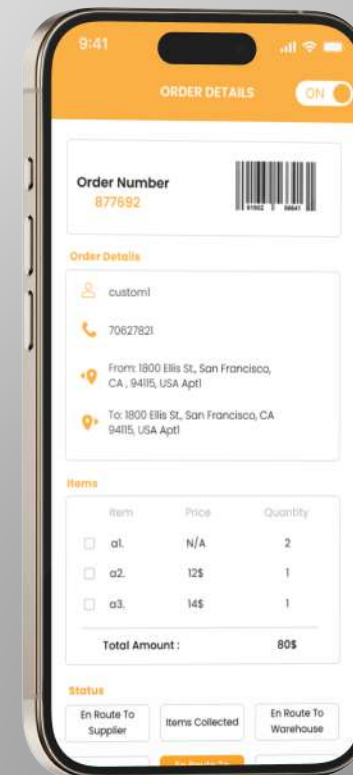

## Client App:

Dynamic, branded app that makes it easy for customers to browse, order, and track deliveries

## Driver App:

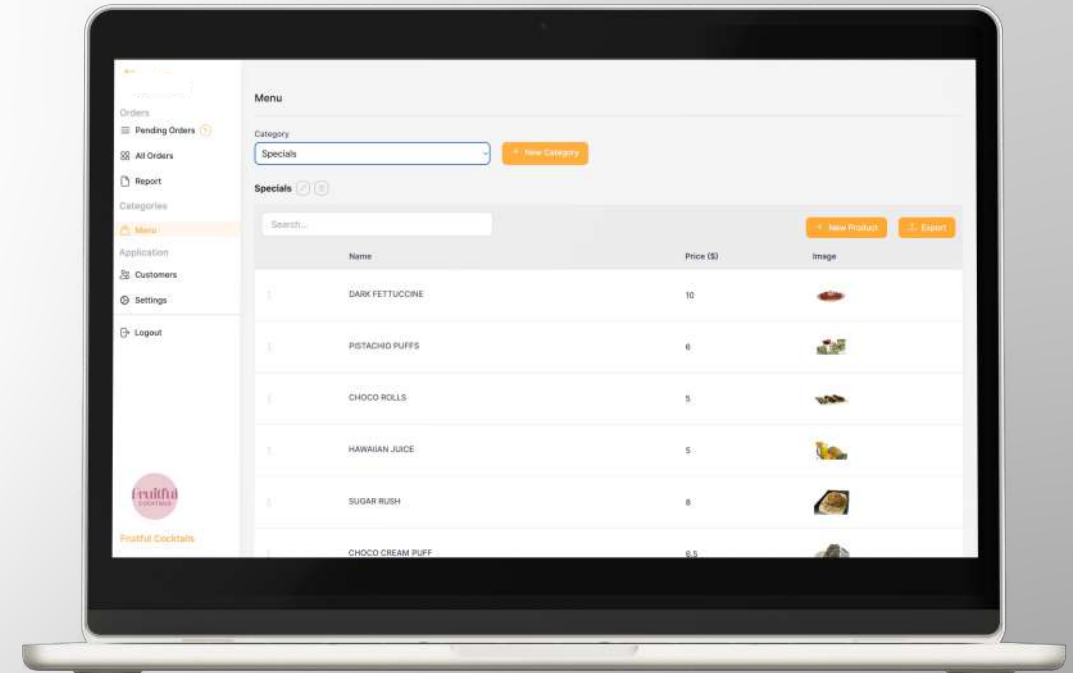

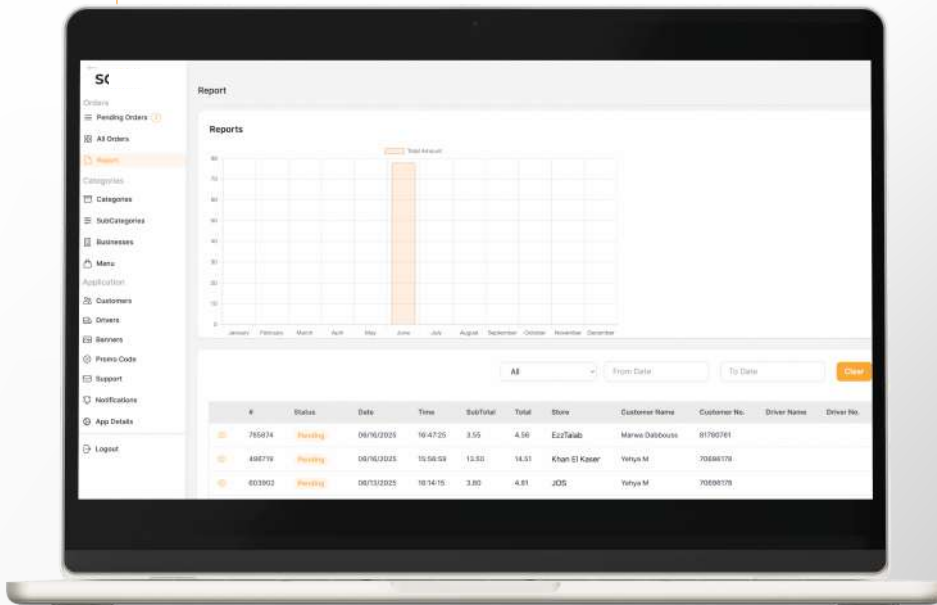

A fast, driver-friendly app with smart tools to accept orders, follow the route, and complete deliveries with zero hassle.

## Admin Panel:

Full control of your delivery business. Manage orders, users, stores, payments, delivery zones, and promotions from one sleek dashboard.

## Vendor Portal:

The Vendor Portal lets stores manage products, prices, orders, inventory, promotions, and sales insights in one place.

# Key Features

## For Users

- Browse stores or search for items effortlessly
- Add to cart, apply discounts, and check out fast
- Choose from multiple payment options
- Get real-time order updates and push notifications
- Track deliveries live and reorder from history

## For Drivers

- Receive instant delivery requests
- Accept or reject orders easily
- Navigate with map integration
- Update status in real time
- Track completed orders and daily earnings

## For Admin

- Manage users, drivers, stores, and orders
- Set delivery zones, timings, and fees
- Control menus, offers, and inventory
- Track sales, payouts, and driver logs
- Launch promotions and edit app content

## For Vendor

- Manage products, pricing, and inventory easily
- Process orders and get real-time notifications
- Track sales, performance, and store status effortlessly
- Create discounts and special offers instantly

## 🔑 Key Features for Your Customers:

- **Personalized Experience:**

The app greets each user by name and remembers their favorites.

- **Smart Search :**

Help customers find products or categories quickly and easily.

- **Daily Deals:**

Promote limited-time discounts and vendor offers with ease.

- **Promo Banners:**

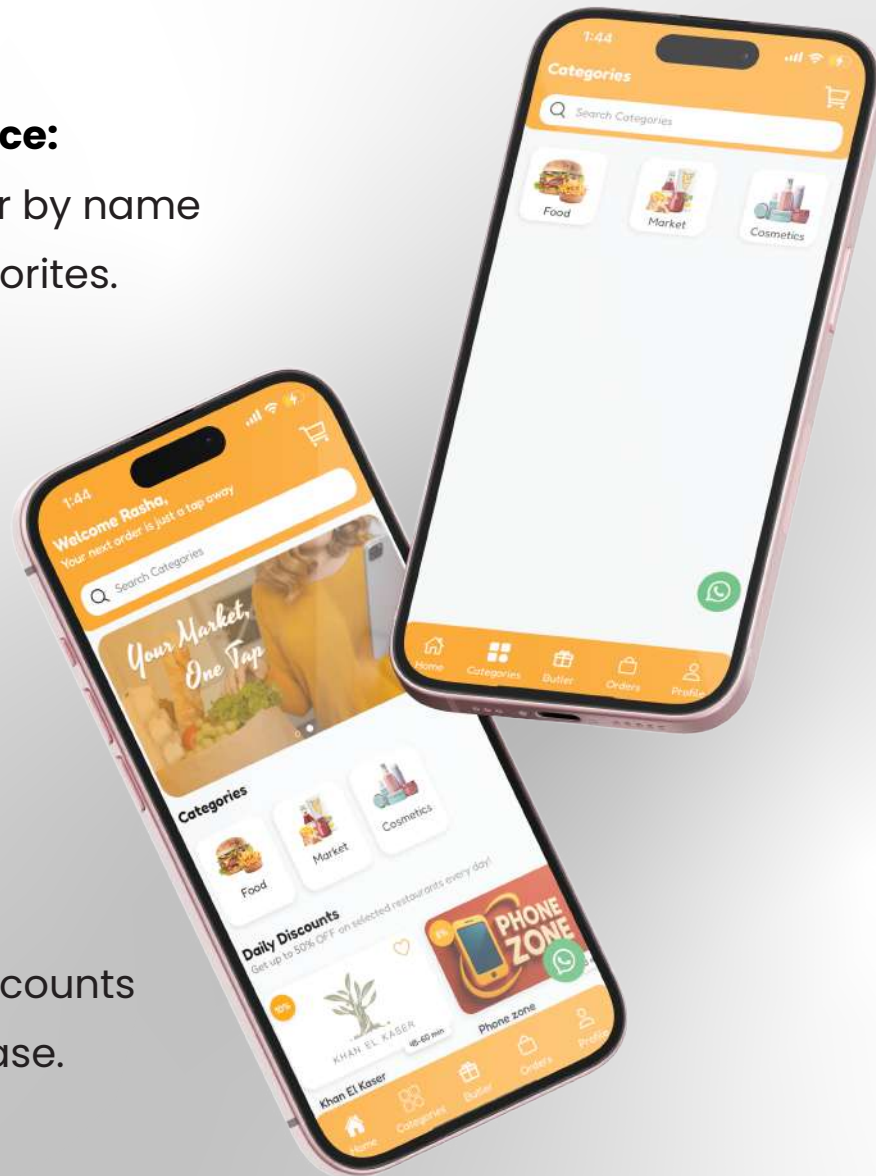

Highlight specials, categories, or events with updatable visuals.

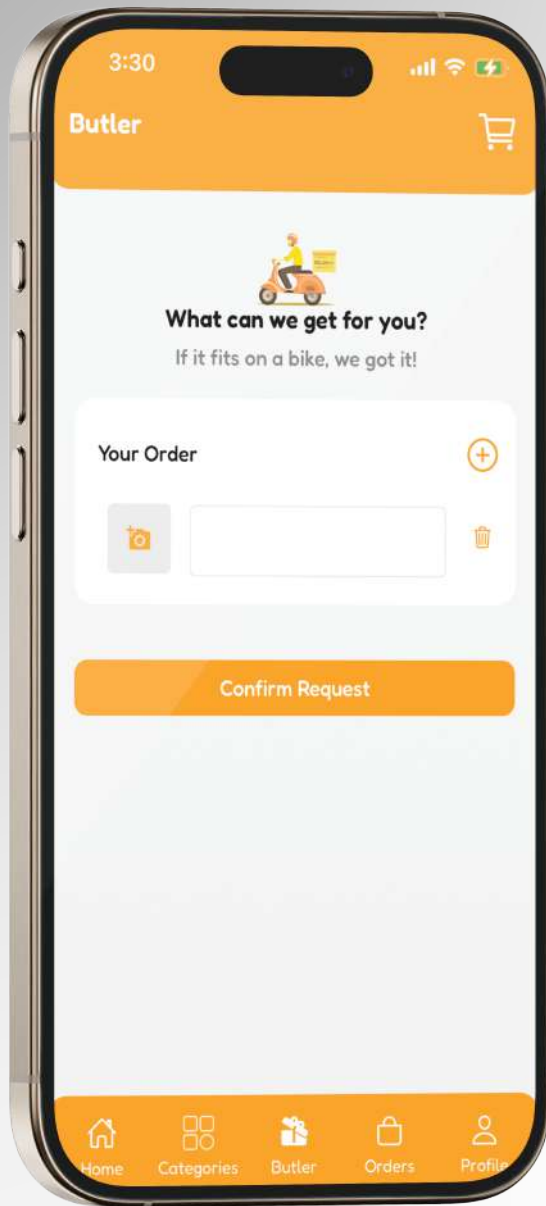

- **Live Alerts:**

Notify users instantly about order status, offers, or updates.

- **Quick Access:**

Guide users to top sections like Food, Market, and Cosmetics.

## Butler Service

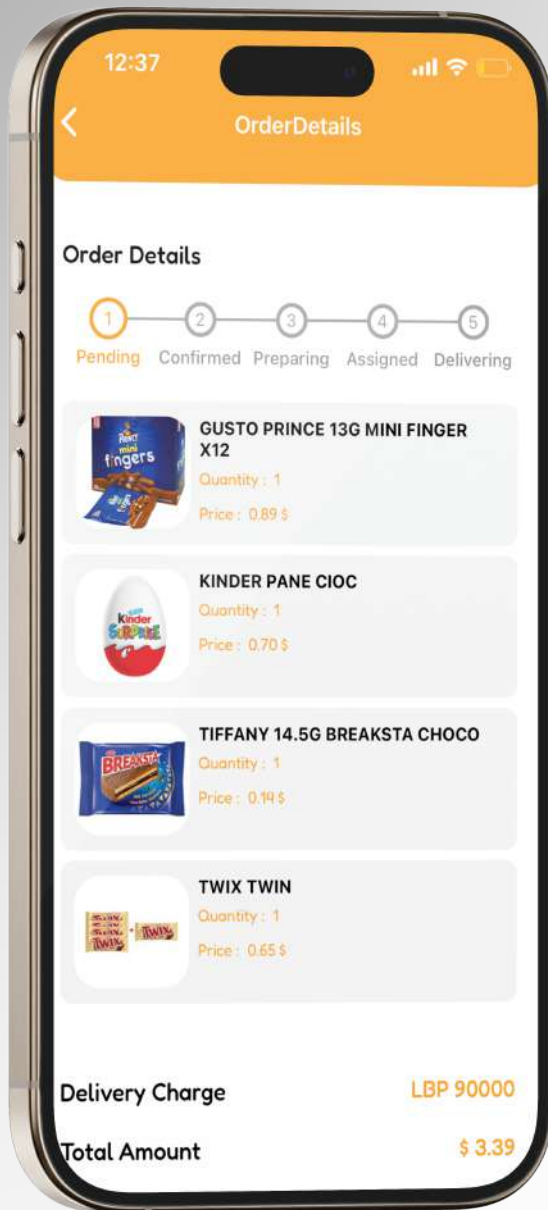

Let customers request anything: from surprise gifts to last-minute errands. A personal assistant they can reach directly through the app.

### How It Works:

A customer types a request (e.g., "Pick up a cake from X Bakery"). The request appears on the admin panel, where it can be handled or assigned to a driver.

### ✓ Key Benefits:

- **Custom Orders:** Handle off-menu or special requests.
- **Flexible Use:** Great for services, gifts, or one-time needs.
- **Admin-Managed:** All requests appear in the admin dashboard for action.

## Order Tracking

Track orders in real time with clear status updates at every stage, keeping users confident and engaged.

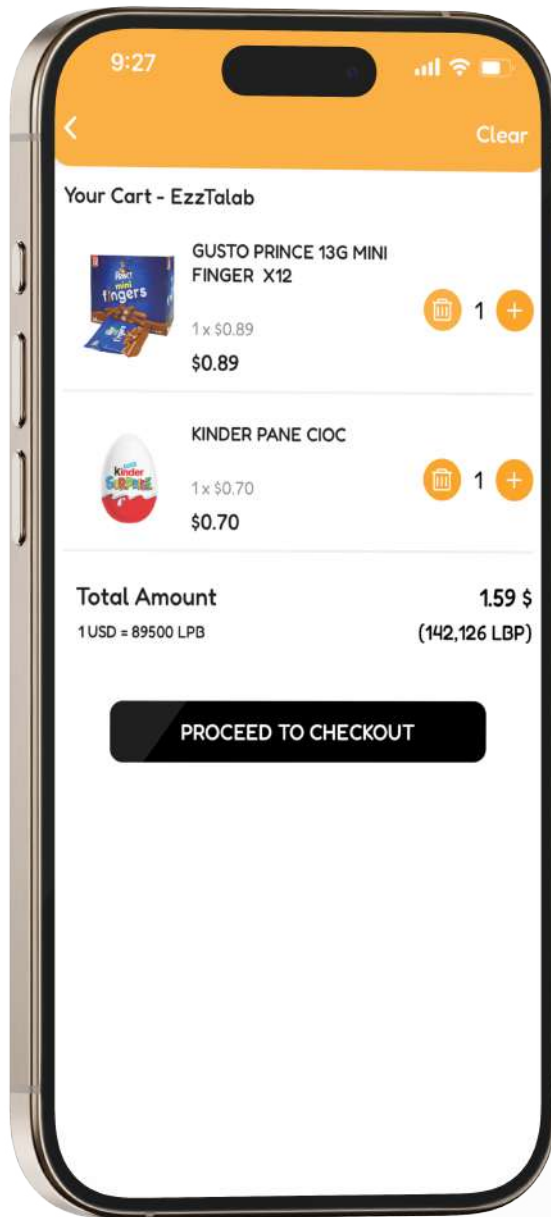

## Live Order Status:

Customers see real-time updates as their order progresses through clearly defined stages: Order Placed, Accepted by Store, Prepared, Picked Up by Driver, On Way, and Delivered.

## ✓ Key Benefits:

- **Fewer Support Calls:** Users can check their order status anytime without reaching out.
- **Clear Communication:** Each stage of the delivery is automatically updated in the app, keeping users informed from start to finish.
- **Full In-App Experience:** No redirects or third-party tools, all tracking happens inside your branded app.

## Cart Page

Speed up order review and checkout.

### ✓ Key Benefits:

- **Clean Layout:** Every item, price, and option is clearly displayed for easy review.
- **Frictionless Checkout:** Confirm address, delivery time, and apply discount codes, all in one place.
- **Full Price Transparency:** Show total cost, delivery fees, and savings before payment.
- **Fewer Drop-Offs:** A smooth, fast experience that reduces cart abandonment.

## Store Page

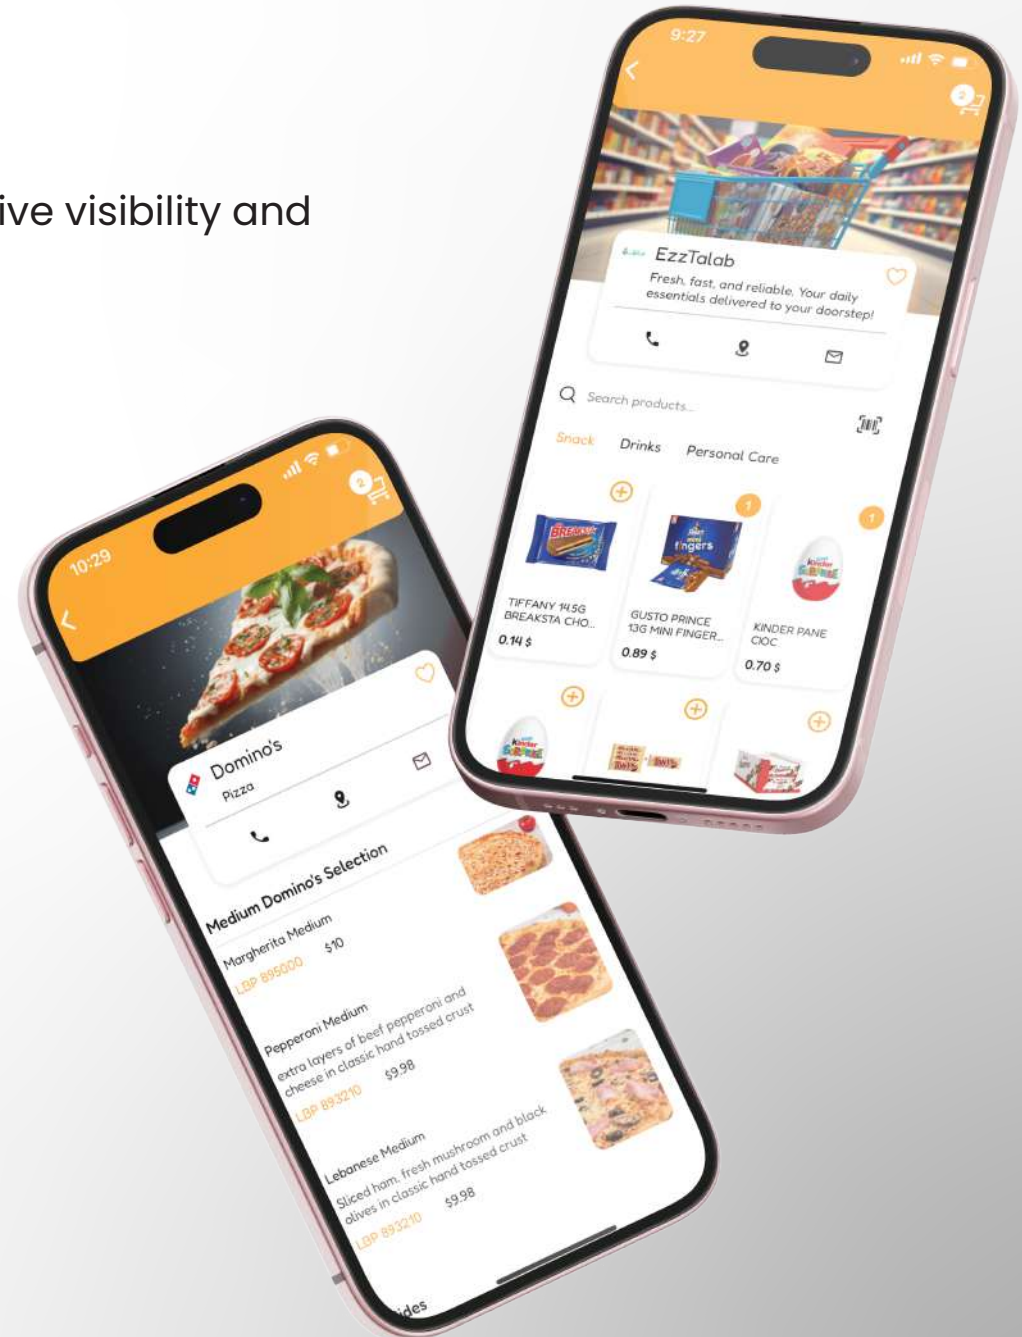

Help vendors sell smarter with store pages that drive visibility and simplify ordering.

## How It Works:

Users tap a store to open its page, where they can browse by category or use the barcode scanner to find items instantly. Store name, logo, delivery time, and active promotions are all front and center, making it easy to shop, trust, and order fast.

## ✓ Key Benefits:

- **Full Store Profiles:** Users see store name, logo, delivery time, and active promos at a glance.
- **Organized Browsing:** Products are grouped into clear categories for faster discovery.
- **Barcode Scan (for Markets):** Scan product barcodes to find and add items instantly.

# Admin Dashboard

Run your entire delivery business from one powerful, easy-to-use dashboard.

- **Order Control:**

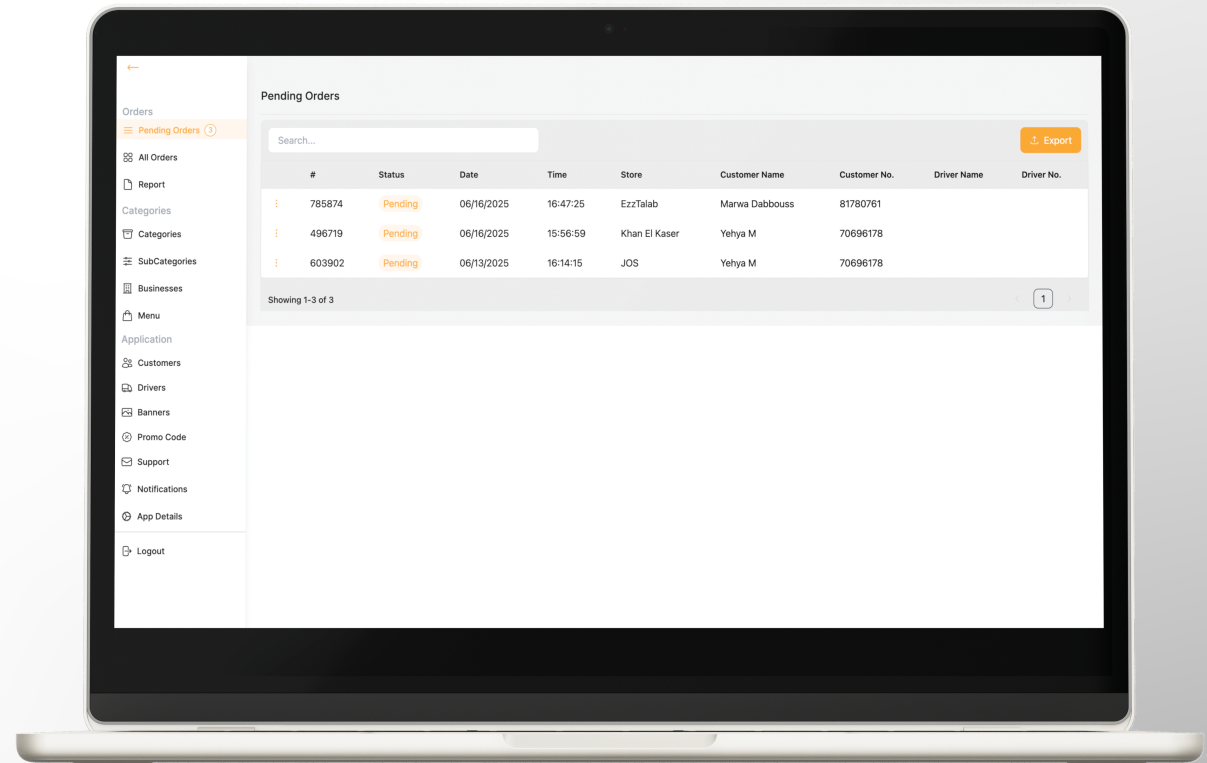

View and manage all incoming orders in real time. Assign drivers, update status, or cancel with a single click.

- **Driver Oversight:**

Add drivers, monitor delivery times, and track performance history.

- **Customer Management:**

Access user profiles, review order history, and resolve issues efficiently.

- **Store and Menu Settings:**

Add vendors, edit menus, set delivery zones, fees, and working hours.

- **Payments and Payouts:**

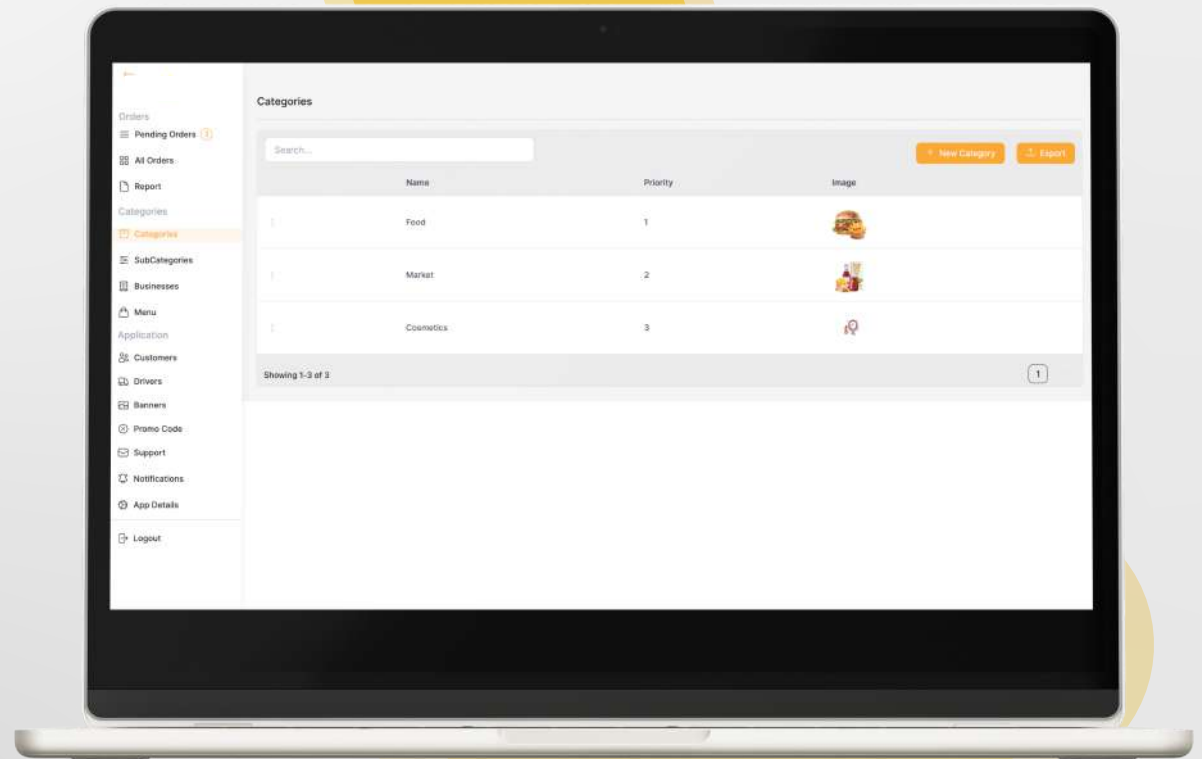

Track all transactions across users, drivers, and stores.

- **Promos and App Content:**

Launch offers, update banners, and adjust categories anytime, no coding required.

- **Analytics and Insights:**

Monitor daily orders, revenue, top products, and driver performance in one view.

# Vendor Portal

Empower vendors to manage their store operations with ease and efficiency.

- **Manage products and menus:**

Add, edit, or remove items and update pricing anytime.

- **Handle orders in real time:**

View incoming orders, update statuses, and manage fulfillment smoothly.

- **Track inventory levels:**

Monitor stock to avoid shortages or overselling.

- **Adjust store settings:**

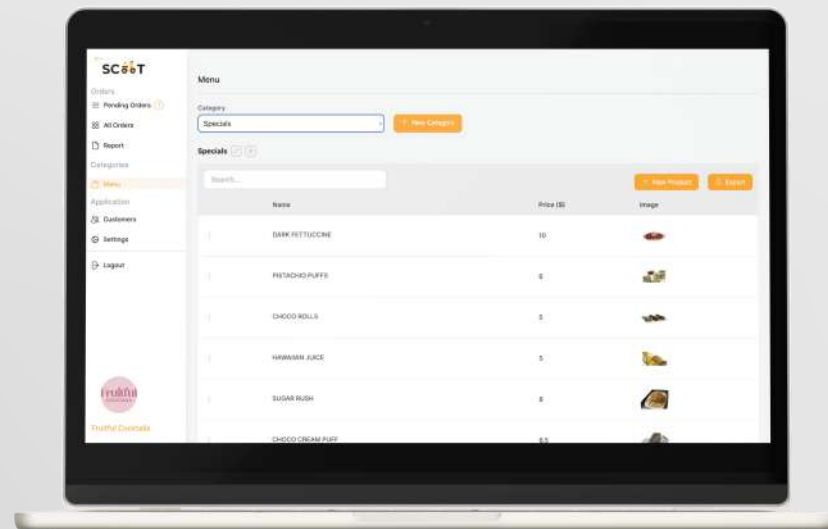

Control hours, toggle availability, and manage delivery zones.

- **Set up promotions and offers:**

Create discounts, highlight featured items, and boost visibility.

- **Review sales and performance:**

Track daily sales, top products, and customer trends for better decision-making.

## Driver App

Equip your drivers with a simple, reliable app that keeps deliveries fast, accurate, and on track.

- **Order Alerts:**

Drivers receive new delivery requests in real time.

- **Quick Response:**

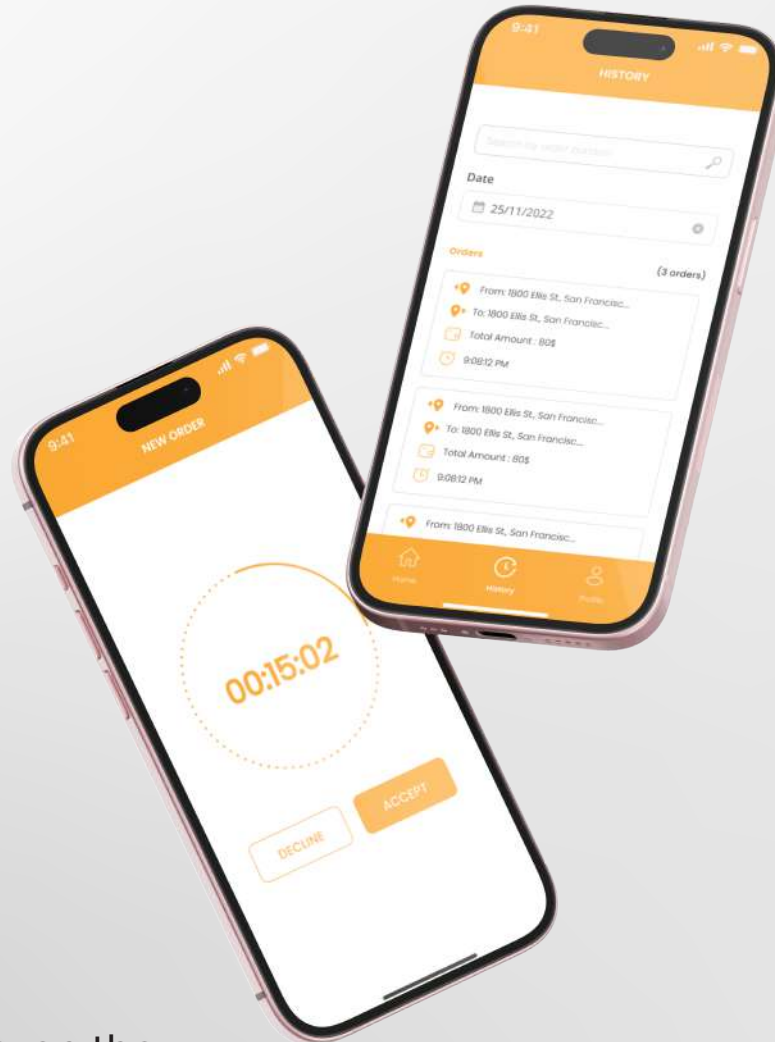

Review details and respond with a single tap.

- **Live Navigation:**

Built-in maps guide drivers from pickup to drop-off.

- **Status Updates:**

Update each stage: picked up, on the way, delivered.

- **Order History:**

Track all completed and canceled orders in one view.

- **Earnings Summary:**

See total earnings and delivery breakdowns daily.

- **Profile Settings:**

Update availability and contact details with ease.

## **Business Value**

Turn every part of your delivery business into a growth engine, from the first tap to the final drop-off.

### **Client App**

Drive sales and repeat orders with a seamless experience, real-time tracking, and built-in promos.

### **Driver App**

Speed up delivery and reduce errors with live routing, clear task flow, and instant updates.

### **Admin Panel**

Control everything from one powerful dashboard, from users and orders to zones and promos.

### **Vendor Portal**

Manage products, prices, inventory, and orders with ease, all from one smart, self-service portal.

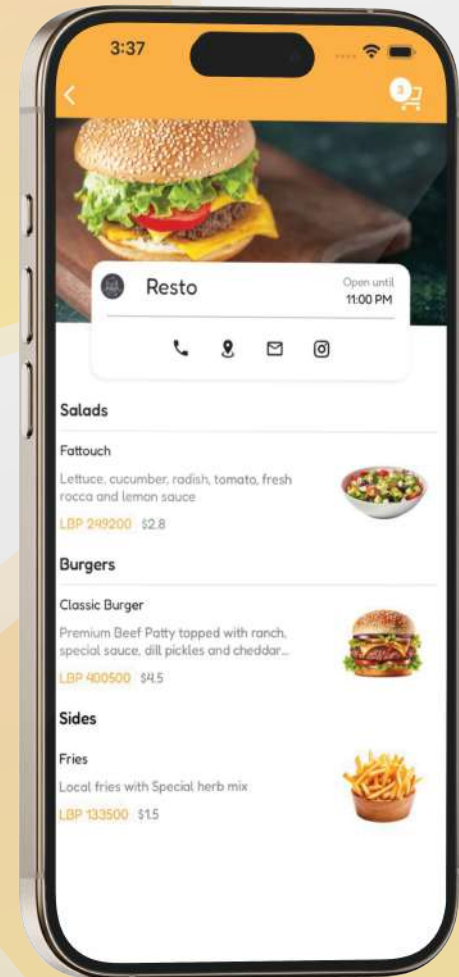

# Why Choose Us

A full delivery platform, built to launch fast, run smooth, and scale with your business.

- **Launch Fast:** Start accepting orders in just a few days.
- **Flexible System:** Customize the platform to fit your brand, services, and delivery model.
- **Scale Easily:** Perfect for new startups or growing businesses with complex needs.
- **Secure and Stable:** Built on scalable tech with multi-language and multi-location support.

*We handle the tech. You focus on growth.*
